DETAILED ACTION

Response to Arguments

Applicant's arguments, filed 11/26/2004, with respect to claim 1 have been fully considered and are persuasive. The rejection of claim 1 has been withdrawn.

Allowable Subject Matter

Claims 1-5, 8-11, 14-15 and 16-17 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: as previously indicated for claim 2 and 8, The prior art does not teach or fairly suggest the concept of sending a second command signal from said integrated receiver/decoder to the selector switch, receiving and locking onto the selected satellite signal in the instance where the selector switch is coupled to the LNB corresponding to the first command signal, and disregarding the second command signal as recited in claims 2 and 8.

Eastman discloses a method and apparatus for receiving and processing command signals having one of a plurality of alternate signal characteristics. The receiver send command signal to the LNB.

The Eastman reference does not teach or fairly suggest the concept of sending a second command signal from said integrated receiver/decoder to said selector switch.
